GETHSEMANE LLC

Software Systems Developer, System Program Development, Operations Management Consultation

Unique Entity ID QEEWF9JX3B67 | **CAGE** 25C71 | **SAM.gov registration active** Dothan, AL | Michael Hudson Atwell II, President 334-714-4048 | hudson.atwell@gmail.com

Established in 2016, Gethsemane LLC specializes in software systems architecture, custom application development, program development, and operations management consulting. The company helps organizations design, implement, and manage technology infrastructure, operational workflows, and service delivery programs.

Capabilities include web and server-based applications, systems integration, process automation, technical documentation, and the coordination of development resources. Gethsemane LLC has completed a federal cybersecurity readiness self-assessment and can scale development capacity on a per-project basis.

CORE COMPETENCIES

- **Custom software development.** Application design, build and maintenance, from requirements through deployment, for web and server based systems.
- **Systems design and integration.** Integration of existing applications, APIs and data sources, including interface design and legacy application migration.
- **Systems administration.** Provisioning, configuration, monitoring, patching and backup of Linux servers and the services that run on them.
- **Technical writing.** System documentation, administrator guides, user guides, interface specifications and operating procedures.
- **Applied research and prototyping.** Working prototypes used to test technical feasibility before larger implementation.
- **Developer tooling and AI integration.** Editor extensions, browser extensions and utilities for working with code, structured data and large language models, published and maintained as public repositories.

DIFFERENTIATORS

- **Cybersecurity readiness documented.** A CMMC Level 1 self assessment completed on Project Spectrum, the cyber readiness platform funded by the Department of War: **15 of 15 practices implemented, SPRS score 100**, with written evidence behind all 47 objectives. A written security policy and a FAR 52.204-21 self assessment are on file.
- **15+ years of product development and project management experience.** Experience includes requirements gathering, technical planning, software development, delivery coordination, documentation and ongoing system support.
- **Additional development capacity.** Through the owner's partnership with Codeable, projects can draw on a network of roughly 350 vetted senior developers, engaged and paid per project through that platform rather than carried as staff.
- **Small purchase ready.** Accepts government purchase cards and is registered for electronic funds transfer, which suits micro purchase and simplified acquisition buys.

PAST PERFORMANCE

- **Codeable, partner and client success manager**, 2014 to present. Delivers software projects and manages client relationships on a platform serving a global client base, with responsibility for sales, developer relations and systems development. Previously delivered client development work through the same platform as a contracting developer. Client engagements are confidential under NDA.
- **GBTI Network, founder and operator**, 2024 to present. Builds and operates a membership platform for developer tooling, and has published ten or more production applications and extensions spanning WordPress plugins, Visual Studio Code and PhpStorm extensions, Chrome extensions and broadcast automation software. Public repositories at github.com/atwellpub and github.com/gbti-network.
- **Institute for Political Economy, Dr. Paul Craig Roberts**, 2011 to 2014. Built the publishing platform at paulcraigroberts.org, a high-volume editorial site carrying a multi-year archive and publishing multiple articles daily to a national readership. This work was performed before Gethsemane LLC was established.

CORPORATE DATA

Legal name Gethsemane LLC

Entity type Alabama limited liability company, taxed as an S corporation

Established February 5, 2016, operated continuously since

Financial standing Profitable, no debt

Business size Small business under applicable NAICS size standards

Cybersecurity CMMC Level 1 self assessment completed September 17, 2026, 15 of 15, SPRS score 100. Written security policy adopted

Primary NAICS 541511 Custom Computer Programming Services

Additional NAICS 541512, 541513, 541519, 541690, 541715, 541990, 518210

Registration SAM.gov All Awards registration **active** September 25, 2026. CAGE 25C71. Renewal due September 15, 2027

Accepts Government purchase cards and electronic funds transfer

Additional capacity Developers engaged and paid per project through the Codeable platform, a vetted pool of roughly 350 senior developers

Point of contact Michael Hudson Atwell II, President, 334-714-4048
